Welcome home to the beauty of wood.

Enrich Your Home with Wood Accents

Timber or log accent pieces can be incorporated into the design of your new home, or they can be added to an existing home to enhance the entire look.

We work with you or your contractor from design through to installation.

Open the door to your dream home; your log home. Come in, relax, and leave the stresses of life behind. The calming fresh scent of wood greets you and nature's beauty is captured within your own home. Ahhh!

Natural Handcrafted Log Homes

If you prefer a natural look, a log that shows the strength and character of the tree from which it came, then you will prefer a handcrafted log home. At Sitka Log Homes we hand peel every log and scribe them to fit perfectly together. We don't mill the character out of the log.

Nature uses human imagination to lift her work of creation to even higher levels.

-Luigi Pirandello

Sitka's creative in-house timber framers will give you the combination of timber and iron work that suits your particular taste whether the finish is smooth, sawn or hand-hewn.

Whether you choose a cozy log cabin, a modern log or timber home or even a large resort lodge, you will be very proud of the quality and unique design of your structure by Sitka Log Homes.
